## New Asheville Location

We are happy to announce that we have opened our new branch location in Asheville, NC. We have offered our services in the Asheville area for over five years; and this new location will allow us to serve the area even better.

Our location at 875 Tunnel Road, just off Interstate 240, will be the base of operations for all of the services that Action Concrete provides. We specialize in commercial formwork, custom basement homes and concrete pumping.

Our residential basement division focuses on custom built homes where quality and accuracy are the priority. Every foundation we build is drafted in AutoCad before it is staked out with a robotic Total Station, providing the most accurate measurements for the foundation. Our staff of experienced foreman and superintendents gives you peace of mind, knowing your basement is being given the attention and service it deserves.

Our Concrete Pumps range in sizes from 28- to 52-meter booms (80'-145' reach). We can provide placing boom systems for taller concrete buildings. We also have smaller line pumps to service the hard to reach areas where a boom pump is not practical.

Action Concrete's commercial division is known for being able to handle the difficult projects. If your job is a simple retaining wall or a 8 story concrete building, we can build it. Our experience and our professionalism make all the difference.

Call us for more information. We would be happy to provide a free estimate.

Asheville Office, 875 Tunnel Road

## Meet the Team

Andre Delgado is the Residential Manager for our new Asheville location. He will handle the sales, estimating and project management for all our residential jobs. Andre has been with our company for several years and is very talented. He started with us as our Field Engineer responsible for the surveying and lay-out on the jobsites with our robotic Total Station. He also created our shop drawings using AutoCad. With his attention to detail, drafting and field experience, it was not long before he began estimating projects and helping manage some jobs.

Andre enjoys the outdoors and can usually be found mountain bike riding or dirt bike riding. Call him at 828-458-8101 to learn more or to receive an estimate.

Andre Delgado

## Meet The Team, continued

**Robert Boettcher**

Robert Boettcher is our field superintendent for the Asheville area. He manages the crews, coordinates materials and is responsible for providing quality basements to our customers. Rob has many years of experience building basements in both North Carolina and Michigan where he owned his own business. Rob's attitude, experience and leadership skills make him a powerful member of our team.

Rob is also a husband and father. He and his wife love to enjoy great restaurants and fine wine. Make sure to ask him how he drinks his red wine. To learn more about Rob and his abilities call him at 828-242-3359.

Jason Hilliard is a new member to our team at Action Concrete. He is a proud salesman, and he is dedicated to meeting the needs of our customers. Jason has an extensive sales background in the building industry, most recently with Stock Building Supply as a sales manager. Jason is excited to meet new builders and create long lasting relationships.

Jason's wife and twin toddler boys keep him busy at home, but he loves to mountain bike and take his kids to the park. If you want to meet Jason or to talk about a project call him at 828-808-4572.

## Moving Mud

**Our new 40 Meter Concrete Pump**

If you have dealt with concrete, chances are that you have used a concrete pump. But have you ever used a boom pump? Our concrete boom pumps are the fastest and most efficient way to place concrete where a mixer won't reach. With reaches from 80' to 145' we are likely to have the pump to fit your job.

Also, they can pump concrete faster than the ready-mix supplier can deliver it. A simple 60-90 yard pour should take less than 3 hours. Try doing that with a small trailer pump. Save half the time. Let the boom pump do the heavy lifting, don't wear out the men.

Best of all, you don't have to buy the more expensive concrete. The standard 3/4" to 1-1/2" mix will work great. That can save you around \$10/cy of concrete every time.

We are experts at concrete pumping. We have a fleet of 10 concrete pumps to fit every job site. Our operators are qualified, professional and certified. Our late model fleet is reliable, but it's good to know that our mechanics are close by to solve any problem.

Find out how a boom pump can save you time and money. Call Jason at 828-210-2025 for pricing or to place an order. Don't forget to ask him for the builder discount.
